CIA IMAGERY ANALYSIS DIVISION

LU-TA STEEL PLANT
DAIREN, CHINA

The Lu-ta Steel Plant is located at 38 58N - 121 37E in Dairen, China.

The plant contains one side-blown converter shop, one probable blooming/rolling mill, one probable foundry complex, a forge/fabrication complex, and numerous associated buildings.

X1 Photography [] revealed very little smoke emanating from the stacks and there appeared to be a moderate amount of rail and road traffic. The spaces between the various buildings were replete with ingots and fabricated materials.

The only change since [] is the addition of one large building (Figure 2, annotation 5, arrow) in the forge/fabrication complex and a few smaller buildings throughout the plant area. 25X

X1 [] disclosed that the monitors on the side-blown converter shop (Figure 2, annotation 1) had been removed and a few small buildings had been erected in the plant area. A moderate amount of smoke was discernable and the spaces between the buildings were replete with what appeared to be fabricated materials.
